Frazer Complaint 6/9/16

I am the Executive Director of the Foundation for the Child Victims of the

Family Courts and the Advocate for the above named adolescent girls who were not granted attorney representation in their quest to seek protection from their accused abuser, their father. All statements made in this complaint are fully documented.

I am writing this immediate complaint to this Board to file this complaint against Eric Frazer, PsyD who felt free to opine on the state of a series of individuals whom he had either never seen, saw very briefly (under an hour) and saw in 2011 under questionable conditions as to his representations in the clinical assessment that was never subject to counter assessment and scrutiny.

Further, it is my understanding that Eric Frazer, Psy.D. has entered into a long term consulting relationship with the client for whom he secured sole physical/legal custody with full medical/educational decision making authority. As part of this long term relationship, Eric Frazer, Psy.D. has continued over the past five years, to be in control of the medical, psychotherapeutic practitioners the girls were allowed to see. He appears to have provided supervision of the continued care by providers he referred and was privy to the personal, intimate productions shared by the girls in treatment with therapists.

It also appears that as part of Eric Frazer's engagement with his long term client, included consultation with the attorneys whom secured and maintained the custody arrangement procured in 2011. Despite the fact that the visitation schedule between mother and children was agreed to be relaxed, so that supervised visitation would not be in place and greater contact was felt to be a good thing for the girls, because of Jane [REDACTED]'s accommodation to the structured arrangement enforced by Scott [REDACTED], no incremental change was ever instituted in the past five years.

Eric Frazer 's supervision of therapists, including Jane [REDACTED]'s therapist, his advice and control of the appointment of new providers and modalities of treatment, continued even over recommendations objected to by the girls.

On 3/24/16 a Protective Order was submitted to the Family Court, before Judge Erika Tindill. Three complaints against Judge Tindill were submitted

to the Council for Judicial Accountability as of 4/25/16 because of her engagement in an Ex Parte Communication on 4/22/16. The Order of Judge Tindill was based on her willingness to take testimony from a psychologist whom had not seen the subjects of his testimony since 2011.

Eric Frazer's interaction with all of the subjects with whom he filed seriously damaging testimony were as noted, individuals whom he had never seen, but felt free to provide damaging, life altering/impacting testimony, in the past and again currently. None of the parties affected by the testimony of Eric Frazer, Psy.D. were provided the opportunity to address their experience with him. There was never a challenge to the validity of his findings.

Eric Frazer's presentations would never have passed muster under the scrutiny of Daubert standard for scientific evidence or Rule 702 of the Federal Rules of Evidence, or an even reasonably competent psychologist who could distinguish between manipulated data, incorrectly administered and someone who even basically followed the rules for administering an evaluation, scoring and evaluating data. The falsification of diagnostic data relating to the assignment of a highly toxic, malignant diagnosis, involving the torturing by falsifying factual, personal information is highly disturbing.

The use of Eric Frazer's proprietary, confidential psychological testing was used as a gun to the head of the protective parent, Jane [REDACTED]. The fallacious psychological assessment was used to decimate her credibility by savaging her mental status, humiliating her in the realm of public opinion. Well known comments whispered behind her back, subject to hushed comments “you don't know..... about the mother.....she is crazy – she is dangerous..... the children have been sooo damaged by her..... the poor father .....what he went through”.

The [REDACTED] girls are subject, by their father, to ritual excoriation, daily, of how” sick, crazy, insane their mother is, how her family never liked him” and now he “does not care”. The narcissistic wound experienced by his ex wife's departure, approximately eleven years ago never appears to have been resolved by Scott [REDACTED] and never was explored on any level by Eric Frazer who has found an ongoing career/source of income, defending the alleged

crimes of accused child abuser Scott [REDACTED].

Scott [REDACTED] walks around with copies of five year old court orders and Eric Frazer's commentary about his ex wife, documents stating that Scott [REDACTED] has sole physical, medical, educational custody/decision making for his children because his wife is a “dangerous psycho.....” Scott [REDACTED] appears to think he is invisible, or will not be confronted by those to whom he has worked to alienate against his ex wife, or those he thinks he has successfully intimidated. There are witnesses and hard evidence of Scott [REDACTED]'s subversion of evidence and witness intimidation.

Unbridled, uncensored, allegations presented by” hired guns”, standing against the poorly defended protective parent of abused children, can easily be out litigated. The attorney discretion afforded to representatives of an obsessed abuser with secrets to hide and emissaries willing to engage in cover ups is a difficult bar to overcome especially for those litigants who are inexperienced in the battlefield of family court/juvenile court/dependency court litigation; such was the early experience of protective parent Jane [REDACTED] and her children, faced with an enemy she never knew she had.

Scott [REDACTED] has paraded his wares before the Police Chief DeMayo of the New Canaan Police, who successfully kept the girls or anyone who tried, from filing complaints against Scott [REDACTED] for child abuse and neglect – because they were told - “you don't know what is really going on.....”, at Yale New Haven Medical Center, where the girls were admitted for spinal surgery, their mother was looked at by her nursing peers as if she were an ax, murderer, the schools where the girls attended, and the courts who said - “I do not care if the girls were sexually abused, they are going to not miss class”. School principles with budgets to protect and reputations to defend stand in lock step with abusers with secrets to protect and child victims to silence.

The fact that the girls have been diagnosed with Lyme Disease, by Lyme Literate physicians, not by fake doctors who play fast and loose with terms they barely understand – like Factitious Disorders and Munchausen by Proxy is a matter that is aggressively buried by Eric Fraser, Psy.D. who on some

level knows that he is shortening the lives of his victims. Just as the venereal disease, Syphilis, invades the spinal fluid, travels to the brain and destroys the brain of the victim infected, so Lyme disease and tic born bacteria and their co-infections mimic psychiatric mood disorders as they as well travel to the brain and destroy matter on the road to causing death.

Yale New Haven Medical Complex is a well known Lyme Disease denier in the forefront of the medical controversy being waged among physicians who treat Lyme patients. The accused abuser chooses medical/psychiatric providers through Yale to join his defense and cover his tracks as an abuser. To date the physical stigmata and psychological symptoms of Lyme Disease and co infections which now because of years of infectious embedding are taking a toll on the girls' mental and physical health, are facts which are suppressed.

The girls are kept from proper medical care, psychotherapy and an education. Psychiatric supervision of ten minutes every two months is not adequate to provide care to girls who are – even by Eric Frazer's report - “suicidal”. Reports of abuse are repressed and the girls pleas for help are met with – you do not want to go to foster care..... do you?”. The girls say - “No – we want to go home to our mother.....” countered by .....”Oh [REDACTED]!” or “Oh Elizabeth!”

The schools they attend are an insult to their intellectual capacity and potential, which is unknown, because Eric Frazer, Psy.D. has never performed any IQ or educational testing or any form of psychological testing to establish a base line between pre and post removal from their mother or intellectual status.

Even the most superficial review of what Eric Frazer, Psy.D. has and has not done would be enough to thoroughly impugn his practice, at the onset of his incursions into the lives of the [REDACTED] sisters and now to protect his reputation and unethical practices from being uncovered. Interference with the ability to procure proper medical care, to assess the state of their Lyme Disease, consistent with their physical and mental disabilities is going to place Eric Frazer, Psy.D. and Scott [REDACTED] in the cross hairs of an

investigation which should include not only medical neglect but depraved and malicious interference in the procurement of multiple levels of care, including medical care, for both girls.

Sua Sponte/Ipse Dixit, the pronouncements of Judge Tindill, based on the seriously flawed practices of Eric Frazer, Psy.D. were taken as final indictments of individuals, the [REDACTED] girls, their protective relatives whom had no voice in the proceedings which fiercely impacted the lives about whom he testified, both in the past and present. The fate of the thirteen and sixteen year old girls whom as per their own statements have endured years and years of acute suffering, terror, emotional and physical serious damage, seemed to have been sealed.

The abrogation of the rights of the subject children to representation, to medical and psychological treatment, to deal with the original trauma, related to removal from their protective parent into the hands of their accused abuser, has been not only precluded by Eric Frazer, Psy.D. but continued through his interventions in choosing assigned therapists, supervising said therapists and modalities of treatment to date. Engagement in dual roles, much less multiple roles of advocate/spokes person/team leader, to the accused abuser, orchestrating and disseminating biased, covert opinions (as will be revealed through documentation of communications between Scott [REDACTED] and members of the his team – DCF Case Supervisor Tim Welch, attorney Jacob Pyetranker, therapist Cody O'Connell, therapist Sarah Beltram,..... and others is not a practice approved by the Ethical Standards of the American Psychological Association or the Ct. Board of Public Health.

Whether or not Eric Frazer, Psy.D. is a card carrying member of such organization, as the American Psychological Association, or other professional organizations, dual roles, continued engagement in orchestration of relationships geared to suppress evidence of physical, sexual, emotional, medical neglect and abuse is not sanctioned.

To be absolutely clear, the accused abuser is alleged to have engaged in a pattern of suppression of evidence through the manipulation of supervised

therapeutic services of Cody O'Connell, Sarah Beltram,..... and the continued false, malicious imprisonment implemented by DCF's Office of the Child Advocate, attorney Egen, through her minions, at the DCF Norwalk office, as well as the Family Court. The Ethics, Standards and Practices of said organization are still the guiding principles of practice governing the clinical intervention, expert witness testimony ruling the practice of all psychologists. All relevant authorities will be made aware of the heinous practices meant to subvert the protection of children in the service of protecting an accused abuser. The children have no access to money or, clearly, to date, the power to access the due process they should be afforded by the courts. Complaints will be filed against all culpable subjects as a beginning of accessing protection for the girls. Reference to the canons of ethics guiding expert witness practice and clinical testing will be addressed in this section of the complaint to follow.

The primary complaint/allegation against Eric Frazer is that he has used his position as an expert, as a purveyor of scientific knowledge, to crush and destroy many lives, the promise of youth, the pleasure of motherhood, the fulfillment of the lives of grandparents to view the fullness and accomplishment of their legacy. Instead, Eric Frazer, used his power and influence to excoriate, defame, libel, vilify protectors, crush the spirit, eviscerate the childhood of ██████████ and Elizabeth ██████████, daughters of Jane ██████████, grandchildren of Cynthia and Rick Diehl, niece to their aunts, cousins to their cousins, separated from all for years. The girls have also been separated from the ability to mourn and grieve for their beloved sister whose untimely death, also attributed to the destructive presence of Scott ██████████. The girls have been silenced in all forums, to speak of, to remember their big sister who tried to fight DCF and was silenced with all others who filed complaints on their behalf. Scott ██████████, now defended by Eric Frazer was a major contributing factor in the death of the girls twenty eight year old sister, a fact which is being attended to as per litigation in preparation against Scott ██████████, DCF and all other actors present in the events laid out in this complaint.

We allege that Eric Frazer engaged in multiple deplorable practices in the service of protecting an individual accused of multiple forms of child abuse

and neglect. We allege that Eric Frazer fully embraced the script of bias, prejudice, defamation, malevolence provided for him by Scott [REDACTED]. The first trajectory involved an individual he never met but whom was placed before him in a position of power, authority and deferential control. She, Jane [REDACTED] has reported being insulted, “yelled at, accused of acts never committed” and made to feel “humiliated, terrified, guilty” for acting to protect her children.

The children themselves have provided their own statements with regard to their thoughts about and experience with Eric Frazer, whom we can document saw them alone for less than a half hour. The girls said they tried to speak to him, but, stated, “ he would not listen”. What listening he did, caused him to use their words against them, stating that they were “coached” and the girls were alienated from their father., by their mother and other members of the family.

Eric Frazer never met the maternal grand parents, Rick and Cynthia Diehl. He accepted the uneducated assessment of Scott [REDACTED] who identified the Diehl's as “dangerous people” and so incorporated Scott [REDACTED]'s assessment of his former in-laws into the custody evisceration that he devised..... no contact with the Diehl's. I suspect that Eric Frazer is not aware that Rick Diehl is an intellectual giant whose technology company works with cutting edge research, pioneers of invention, development and financing for research which will change the world and in fact has already experienced major documented contribution (see attache CV for Rick and Cynthia Diehl). Eric Frazer's campaign of libel and defamation went through the scriptures written by him like a hot knife through butter. He appeared to never expect any level of scrutiny, countering his attack.

Jane [REDACTED], RN, before the decimation of her career, was engaged in a stellar practice as an Emergency Room/Intensive Care nurse for more than thirty years. Jane [REDACTED]'s sisters, their children were similarly vilified as sick, malevolent people. It would seem safe to suggest that Eric Frazer does not know that one sister, one aunt is employed by “The Make a Wish Foundation”, Founder of the Non Profit Foundation “Love To Live To Love”, the other sister is a missionary nurse who works all over the world and who

lives in Europe with her husband and children in a fairy tale existence that her nieces have not been able to enjoy/partake in, for years. There are young cousins who live minutes away from [REDACTED] and Elizabeth but they are forbidden from seeing them or speaking with them by the father.

Information that lacked veracity, much less any basis in fact – multiple suicides, mental illness – pervasive in the Diehl family was memorialized into the data bank of the “confidential” sealed document of the Custody Evaluation, despite such information being, as stated, false. The evaluation may have been sealed to Jane [REDACTED] and her representatives, but widely published by Scott [REDACTED] and shared in any capacity that would destroy Jane [REDACTED]'s professional/personal reputation and credibility – based on the authority of Eric Frazer.

On the other hand, Scott [REDACTED]'s move from teaching physical education in a local Catholic School, then another local private school, to running a carpentry business never seems to have been explored. His flawless background, based on the reluctance of those too fearful to take on the rage and intimidation to report him for crimes for which he should have been reported, has left his reputation untouched. While Scott [REDACTED] moves through life destroying the reputations, physical and emotional health of all who are intimately involved with him, he appears to be able to cover his own tracks, quite well, to date. The inimical bias, cut and paste preparation of history, failure of any independent research to validate information provided by him, seems to be a task seriously avoided by Eric Frazer.

Frazer was hired as an expert, hired to provide a family psychological assessment, not a family evisceration based on diagnostic manipulation/contortion in service of protecting an accused abuser. Eric Frazer put forth a diagnostic assessment that in no manner resembles the pathology profile not exhibited by the subject in question. Given the nature of the obscure, highly technical disorder Eric Frazer assigned to Jane [REDACTED], now referred to as – the subject, Jane [REDACTED] victimized by Eric Frazer, one would expect an excess of care, intellectual/academic rigor and elucidation to explain why such an assessment fits. If anyone bothered to look, or understand what Eric Frazer wrote, they would understand that the evaluation

is not only deeply flawed and inaccurate, it is alleged to be designed to cover seriously malignant pathology on the part of the accused abuser as well as an act of deliberate, conscious, criminal fraud.

That which adds to the suspicious nature of Eric Frazer's long term engagement with Scott [REDACTED] is the fact that he has taken on multiple roles and functions in Scott [REDACTED]'s life – supervisor of clinical providers, consultant to attorney Pyetranker, to DCF supervisor, Tim Welch, referral source to Yale for medical and psychotherapeutic services.

The continued involvement with Yale Medical Center whose controversial reputation related to their position on Lyme Disease does not make sense is of concern. The medical expert – Dr. Shapiro, from Yale, did not examine the [REDACTED] girls, but stated - “they do not have Lyme disease”. The girls were diagnosed with Lyme disease years prior to the custody transfer. The girls were sick, they continue to be sick. They continue to have the physical stigmata of Lyme disease and the physical/psychological symptoms of Lyme disease. They are not being medically evaluated or treated for Lyme disease. Their prognosis is of grave concern.

The girls attend school, but do not function in schools that are “designed “ for emotionally disturbed children so they do not “report “ class attendance and “adjust” grade reporting. The schools report to Scott [REDACTED], just as therapists report to Scott [REDACTED].

In summary, every category of the ethical standards of practice/scientific methodology is violated in the services provided by Eric Frazer. Jane [REDACTED] and her family are not the only known victims of an individual whom we are bringing to your attention a predatory, depraved member of your professional community. His seriously negative reputation is well known, just not to those in crisis, in a panic, seeking authentic clinical services.

Jill Jones-Soderman
