

The Klan Is Not Dead- In Defense Of Dr. Monty Weinstein

THE KLAN IS NOT DEAD

The Klan (KKK) is not dead, it simply operates under a different name:

AKA

THE PSYCHOLOGICAL BOARD OF EXAMINERS

The only difference between the Board of Psychological examiners and other divisive groups is that the klan wears hoods and the psychologists hide under the Color of State Law, refusing to disclose the perpetrators of the conspiracy against Dr. Monty Weinstein.

It is interesting to note that Dr. Anne Hazard, one of the so called informers was the same person Dr. Weinstein impeached in two cases: Evans v. Barnes and Philips v. Philips. It is also interesting to note that Dr. Anne Hazard had a business relationship with Dr. Mc Garrah who is another business partner of Dr. Carolyn Web who sits on the psychology Board. Dr. Web was instrumental in getting this witch hunt moving.

Furthermore, Dr. Elizabeth King, whom I spent an entire day impeaching in the Gregory Eisenhower case, has a personal relationship with Dr. McGarrah and Anne Hazard. Dr. McGarrah is on another case with me, Jenkins v. Jenkins. On this case Dr. McGarrah used Dr. Cohen of Columbus , Georgia . Upon information and belief, it appears that Dr. Cohen was coerced into this complaint against me which now sits before this Board.

Also, of extreme importance is Dr. Buchanan's role in this conspiracy. Dr. Buchanan was on two cases with me when he had ample opportunity to impeach me but instead took the cowardly route to join the so called psychology club to try to hamper my free speech. Dr. Buchanan was one of the operatives in the Eisenhower case which ended up in the tragedy of Greg Eisenhower's death.

These people have an agenda which leads to breaking up families.

If one was to Google the names of any of these people their name barely if ever appear. Clearly jealousy reigns, as if one Googles my name seventeen plus pages appear along with over one million views of my web site.

Following consultation with a team of attorneys who are lined up to assist me; rest assured that this is not some psychological, delusional conspiracy but a RICO act which needs to be investigated and revealed. It is also the opinion of this team of attorneys that this group needs to return to school to review the first amendment rights that exist within the U.S. Constitution.

Further, it is the view of a number of my colleagues that there are severe anti semitic overtones as well as racial over tones to the prosecution of this case. I believe that all of the programs involved at this point should be investigated because of Federal monies being spent in several areas of Georgia .

I had an office in Cummings , Georgia but fled because of the anti semitic and anti black agenda in those areas.

My son and daughter-in-law have proudly served in the U.S. armed forces and these bigots are trampling on the due process rights of the U.S. Constitution.

I have never used the complaint regarding anti Semitism though I now allege that Mr. Baron, the Attorney General who was instrumental in this ignominious prosecution is in fact a bigot and an anti semite. In this regard it is noteworthy that I was served legal papers

during my religious holiday , Passover, given eight days to respond to the accusations against me.

Mr. Baron is to the Psychology Board as Himmler was to the Third Reich.

We as Americans should take a good look at exactly who should be prosecuted for these unethical activities, for if anyone can attempt to prosecute me – who is next?

WAKE UP Mr. Governor. I am not going away.

My group is not going, it is growing and no attack on me will be tolerated.

Most Sincerely,

Dr. Monty N. Weinstein
PSY.D; FAAP, M.P.A.; D.A.P.A., N.C.P DIRECTOR OF THE FAMILY THERAPYCENTER
