

People seeking asylum show up at our border and our laws say the INS is supposed to take their claims at face value and process them through the courts. They are not doing so and violating the rights of these people. Then, to add insult to injury, they steal their kids and ship them to out-of-state facilities run by private corporations who treat them like criminals, collecting millions of dollars in the process. Sound familiar?

It sound familiar because right here in Arizona, we currently have 18,000 kids being held hostage by private corporations run by cronies of the Governor and the head of DCS.

Currently, the Department of Health & Human Services pays DCS around \$90,000 per head for kids kidnapped or seized WITHOUT COURT ORDERS in violation of the Fourth Amendment. They refuse to go to courts and show evidence that the kids are being abused or are in eminent danger (required by the Constitution). These kids are given to cronies operating FAKE "non-profit" foster care agencies. These so-called "non-profits" are paying "consulting fees" to insiders who steer these child victims to these agencies who have no-bid contracts. FOLLOW THE MONEY. How many kids are drugged? How many molested and raped? How many die in custody and we never know?

Point is: It's not just the 2000 stolen at the border (there are still kids being held from a couple years ago and we are paying over \$100,000 per year to "care" for them when they could be in the care of relatives. RACKET.

The dirty scumbags at INS and DCS have sweetheart deals with their cronies and the kids are victims. Parents can't get them back. FOLLOW THE MONEY.
