Attached – Introduction to the Work of the FCVFC
Notice of Complaints Being Filed

Please be advised that the FCVFC has received numerous complaints about your practice as a Guardian ad Litem in the Family Courts of King County, Washington.

We are and have been in recent weeks reviewing multiple facets of your work product, your interactions with clients, and the outcomes and consequences of your direction. We have been documenting and recording distressing accounts about the impact of your intervention and resulting destructive outcomes to the court-appointed clients who are caught in the Scylla and Charibdis vice of Court Orders issued by judges blanketed with immunity and Court actors who enjoy and abuse qualified immunity such as yourself.

We are seeing the rise of the Court-created phenomenon of “Parenting Police”: an artificial layer of bureaucracy whose purposeless imposition is questionable at best and in which the level of fraud; criminal extortion of fees; suppression of the voices of vulnerable, abused children; and the dismembering of the rights of protective parents are visible if not yet clearly articulated.

Please be very clear that the purpose of FCVFC is the clear articulation of fraud and abuse of power, confronting deprivation of due process, and addressing limitations of access of litigants to the Courts. The pursuit of shutting down those professionals who use their degrees, their licenses, and their authority to shred families and destroy loyalties and trust in the liberty rights of parents to protect their children is at the forefront of our mission in speaking for disenfranchised litigants, both children and adults. Such protection that should extend to protect children from predator parents has been compromised in too many cases. The specialized, idiosyncratic status of parents has devolved to make the class of parents in custody litigation in Family Courts inaccessible to the normal protections of law that would be available to strangers who commit the same crimes. Crimes of alleged incest and psychological abuse are mitigated through false arguments allowed in Family Courts across the country. These crimes are fostered by junk science, dealt with as “family offenses” as opposed to crimes, and adjudicated in criminal courts.

In reviewing many cases in which you are engaged or have been engaged in the past, we find the same robotic arguments advanced in an assembly-line-like routine of false narratives and specious psychological applications outside of your expertise used for purposes of exacting and manipulating control and power over clients via the spectre of court reprisal for challenging your authority. Your billing practices add to this abuse of power wherein you impose a constant flow of ongoing charges to parents who require copies of records and have to navigate those charges that create a financial windfall for you and an impediment to those parents seeking to acquire documents needed to acquit their own legal cases against your frivolous arguments.

Of greatest concern to the FCVFC in our case reviews is the level of callous, conscious malevolent harm to children whose spirits you clearly seek to break and whose parents you humiliate. These parents are set against each other in regards to parenting and their children are forced into dealings with abusers who would otherwise be subject to restraining orders or jail.

The interventions ordered at your direction create a life-long legacy for children forced to deal with the trauma created by ill-advised interventions imposed at your direction. Children forced into reunification with their abusers and children with parents whose very act of hiring you (permitting “the all force necessary” orders that force them under the most extreme protest to submit) attests to the sadistic character of those parents as

well as those complicit in implementing compliance with the nature of the autocratic character of your practice.

The legacy of destruction to these vulnerable children's psyches, character, ability to trust, and ability to form bonds of love and loyalty may be incalculable existentially, but factually, our financial forensic experts are figuring it out. In closing, I wish to note that the material we are reviewing related to the tragic suffering experienced by clients subject to your brutal imposition of control is being documented in complaints, exhibits, affidavits, testimony, and with legal arguments challenging qualified immunity and will be sent to all relevant authorities regulating your practice.

You will be receiving copies of the complaints that are being prepared for filings against you for the crimes committed against the unfortunate clients ordered into your grip.

Jill Jones-Soderman
