To Dr. Paul Jocher.  
From Dr. Jill Soderman -  
Re: Harassment & Abuse of Danielle Lough & her  
three sons -

Attached is a brief note to the Court with  
regard to material of which I am aware re:  
the abuse of these three children & their fear  
and dislike of their father.

When left alone at any time & just now -  
we attended by a friend of Danielle's if she  
is away from home for work. However  
the children are fearful about giving out  
the names of their caretaker to other people  
that their father will "hurt" whenever  
attempts to assist Danielle & the children -

A note is that as soon as I returned from

court with Danielle & began receiving numerous strange phone calls of men speaking in hushed tone - heavy breathing & moments of silence - I received approximately a dozen calls the first evening when I returned from court. When I stated that the calls were being recorded & traced - they reduced in number - I still receive an occasional bizarre call - a situation I never experienced in the past -

As noted - I have attended court with Danielle on two occasions for restraining orders - once with Judge Newman - & the second time with Judge McVeigh - who refused to see the children in chambers or to assign a guardian ad Litem for their protection - Her solution to conflicting testimony from a Puerto Rican schizophrenic former shelter incumbent & current neighbor of Danielle Lough - was to recommend that the children be placed in foster care until Dypna could evaluate the situation - Dypna had never returned the judge's call - so the case was referred to me -

I would consider any separation of the children from their mother, utterly outrageous & an egregious & blatant lie on the court's part - If I can be of any help - please call me at - 978-8210- (973-) J
